## Language Laboratory

**Practice** leads to language learning **success!** Language labs' **interactive** courses help students learn much faster than in a **regular classroom** setting. The **methodology** of the classroom language network uses a progressive model to promote natural learning, where students learn the different concepts of language in an **intuitive** way. The **language lab boosts** the **motivation** of students achieving higher levels of language retention and progress.

Language labs are becoming **highly valued** at colleges because they offer students a structured **e-Learning** environment that is **successful** and **reliable**. New technologies are increasingly more present in **classrooms** as they facilitate the **teacher's role** in creating a more attractive learning environment for the student and can offer more practice hours and up-to-date exercises than can be found in language books.

The Don Bosco Institute of Technology provides a platform for our students to practice the language with a much wider **variety** of **activities** and **exercises** based on the computer. Learning occurs in a **structured** way, in a **real context** and visually **attractive** way that immerses the student in the language learning environment and **promotes** language use. Our students can watch videos, practice their **pronunciation** through a speech recognizer, learn new vocabulary, and much more with the help of the our Language Lab .
